

August 23, 2010

**Dear Parents:**

Little Cypress-Mauriceville C.I.S.D. provides each classroom and all computer labs with a direct connection to the Internet. The Internet provides students and faculty with research and communication opportunities to enhance the education experience.

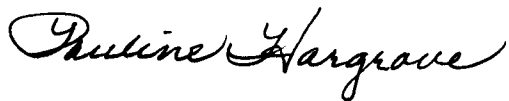

With this opportunity come various liabilities and responsibilities. We are asking every student and user to enter into an agreement to abide by the rules and to not access information that is inappropriate for school use. We are also asking every parent to sign permission forms giving their child permission to use the Internet for classroom assignments, and to encourage their student to abide by the strict guidelines, which are printed on the attached permission form.

Elementary students will **only** access Internet sites selected by their teachers and will view selected sites with the teacher present.

**Students without permission forms will not be allowed to access the Internet.  
Students who fail to follow the rules may lose all on-line privileges for the remainder of this school year.**

Thank you for your cooperation and support in helping us to serve our students effectively.

Sincerely,

Pauline Hargrove  
Superintendent
